

Document Quality Overview

Two-dimensional quality evaluation for comprehensive document validation

Generated for quality assurance, audit-readiness, and remediation planning workflows.

File Name	09_recordkeeping_classification_policy_COMPLETE.txt
Document Type	Recordkeeping and Classification Policy
Evaluation ID	C5iDQI-20260508-L0459J
Review Date	08 May 2026

Key results and findings begin on the next page.

1. Executive Overview

This section summarizes key outcomes, risk posture, and issue concentration from the completed evaluation.

54/100	CRITICAL	16	60/100	47/100
OVERALL SCORE	QUALITY STATUS	ISSUES FLAGGED	INTEGRITY SCORE	DOMAIN SCORE

Critical	Moderate
5	7

Executive Summary

This is a comprehensive Recordkeeping and Classification Policy for Meridian Bank plc, detailing document classification levels, regulatory retention schedules, storage and disposal standards, governance controls, and approval history. The document is well-structured, version-controlled, and aligned with multiple regulatory frameworks (CRR III, MiFID II, GDPR, FCA SYSC). Deterministic evaluation significantly understated completeness and timeliness despite clear supporting evidence.

Risk Assessment

Overall document quality risk is low. The policy is structurally sound, properly versioned, approved by accountable executives, and contains explicit regulatory mapping and retention controls. The only notable issue is a metadata inconsistency in the deterministic output (document_date_parsed does not match the stated creation date), which may indicate a system parsing error rather than a document defect.

LEGAL HOLD	Material disclosures missing — filing flagged for mandatory remediation
------------	---

2. Quality Dimensions

Core metrics are evaluated for every document. Domain-specific metrics are included only for domain-classified documents.

2.1 Core Quality Metrics

Metric	Description	Score	Weight	Status	Reasoning
Completeness	Checks whether the document contains all expected sections, fields, and structural elements.	4	0.25	Critical	Document contains full policy structure including purpose, scope, classification scheme, retention schedule, controls, governance, approvals, and version history. Deterministic score of 0.0 is not supported by the text.
Validity	Verifies that dates, references, and identifiers conform to expected formats.	71	0.20	Warning	Document includes valid document ID, dates, versioning, regulatory references, ownership, and approval signatures. Minor metadata parsing inconsistency noted in deterministic output (parsed date mismatch).
Consistency	Checks coherence across sections — summaries match body, terminology is uniform.	100	0.20	Good	Dates, version history, regulatory references, and retention schedule are internally consistent. No contradictions identified.
Accuracy	Evaluates whether numeric values, calculations, and factual references are correct.	98	0.20	Good	Regulatory citations and technical standards are presented in a plausible and structured manner. No factual inconsistencies detectable from the text alone.
Timeliness	Assesses whether the document has been reviewed recently and carries current dates.	4	0.10	Critical	Creation date (2024-03-01), approval dates (2024-03-09/10), and next review date (2025-03-10) are clearly stated. Deterministic score of 0.0 contradicts explicit date evidence.
Uniqueness	Detects duplicate or near-duplicate sections, paragraphs, or entries within the document.	100	0.05	Good	Unique document ID (RCPC-POLICY-2024-001), structured version history, and organization-specific references support document uniqueness.

2.2 Banking Domain Metrics

Detected domain: **Regulatory & Compliance Filings**

Metric	Score	Regulatory Threshold	Status	Reasoning
Regulatory Mapping Precision (RMP)	100/100	Reg. Pass ≥ 90 EBA RTS compliance	Pass	Found 2 text reference pattern(s), 0 structured regulatory reference field(s), and 0 obsolete reference(s) (2 total evidence points). Deterministic: 100. Blended (70/30): 100. AI Confidence: 100%
BCBS 239 Data Lineage Integrity (DLI)	0/100	Reg. Pass ≥ 80 BCBS 239 Principle 3	Below Threshold	Found 0 automated lineage marker(s) and 0 manual-intervention flag(s). Deterministic: 0 Blended (70/30): 0. AI Confidence: 100%
Regulatory Change Coverage (RCC)	40/100	Reg. Pass ≥ 80 Change control std.	Below Threshold	Detected 2/5 change-control marker(s) and 0 obsolete reference flag(s). Deterministic: 40 Blended (70/30): 40. AI Confidence: 100%
Disclosure Completeness Score (DCS)	11/100	Reg. Pass ≥ 85 Pillar 3 disclosures	Below Threshold	Disclosure topics present: 1/8. Quant artifacts: 0, table markers: 1. Deterministic: 11 Blended (70/30): 11. AI Confidence: 100%
Governance Sign-off Completeness (GSC)	100/100	Reg. Pass ≥ 90 Governance attestation	Pass	Governance sign-off evidence: 5/5 marker(s) present. Draft flags: 0. Deterministic: 100 Blended (70/30): 100. AI Confidence: 100%
Control Mapping Coverage (CMC)	0/100	Reg. Pass ≥ 80 Control mapping std.	Below Threshold	Found 0/6 control-mapping marker(s). Deterministic: 0 Blended (70/30): 0. AI Confidence: 100%
Recordkeeping & Classification Policy Coverage (RCPC)	80/100	Reg. Pass ≥ 80 Recordkeeping policy	Pass	Recordkeeping/classification coverage: 4/5 marker(s) present. Deterministic: 80 Blended (70/30): 80. AI Confidence: 100%

3. Issues & Observations

This section captures all flagged issues (as shown in the application).

Field	Issue Type	Description	Regulation	Severity
Document Body	Insufficient Content	Document is too short.	—	Critical
Document Structure	Missing Headings	Lacks clear section structure.	—	Moderate
Document Metadata	No Date Found	No recognizable date found.	—	Moderate
Document Ownership	No Author	No author/owner identified.	—	Moderate
Document Scope	Missing Scope	No scope statement found.	—	Moderate
Document Currency	No Year	No year references found.	—	Moderate
Review Schedule	No Review Date	No review date found.	—	Moderate
Document Body	Accuracy	Deterministic output states 'Document is too short'; however, the document contains multiple structured sections, detailed retention tables, and governance controls.	—	Good
Document Metadata	Accuracy	Deterministic output claims 'No Date Found' and 'No Year references found,' but multiple explicit dates (2024-03-01, 2024-03-10, 2025-03-10) and version history years are clearly present.	—	Good
Document Ownership	Accuracy	Deterministic output states 'No Author'; however, Document Owner, Prepared By, and named approvers are explicitly identified.	—	Good
Review Schedule	Accuracy	Deterministic output indicates 'No Review Date'; the document clearly specifies 'Next Review Date: 2025-03-10' and an annual review requirement.	—	Good
Extracted Field - document_date_parsed	Consistency	Parsed date (2025-03-10T00:00:00) does not match the stated Creation Date (2024-03-01), suggesting a metadata extraction or parsing error.	—	Moderate
BCBS 239 Data Lineage Integrity (DLI)	banking_metric_below_threshoId	BCBS 239 Data Lineage Integrity (DLI) scored 0/100 (target: 80). Requires attention: Document data lineage (source systems, system-of-record, ETL/feeds, audit trail) and controls over manual adjustments.	BCBS 239 Principle 3	Critical
Regulatory Change Coverage (RCC)	banking_metric_below_threshoId	Regulatory Change Coverage (RCC) scored 40/100 (target: 80). Requires attention: Add change control evidence: version history, effective date, revision log, and how regulatory updates are tracked.	Change control std.	Critical

Field	Issue Type	Description	Regulation	Severity
Disclosure Completeness Score (DCS)	banking_metric_below_thresho Id	Disclosure Completeness Score (DCS) scored 11/100 (target: 85). Requires attention: Add the mandatory disclosure sections for the document's framework (e.g., Pillar 3 topics or policy/framework sections like scope, roles, requirements, evidence, review cycle).	Pillar 3 disclosures	Critical
Control Mapping Coverage (CMC)	banking_metric_below_thresho Id	Control Mapping Coverage (CMC) scored 0/100 (target: 80). Requires attention: Provide a control mapping matrix linking requirements → controls → owners → testing cadence → evidence artifacts.	Control mapping std.	Critical

4. Action Plan

4.1 Remediation Steps

Action 1: Expand the Recordkeeping and Classification Policy to include mandatory sections: Purpose, Scope, Definitions, Regulatory References, Roles and Responsibilities, Record Retention Requirements, Classification Standards, Data Lineage Controls, Regulatory Filing Requirements, Monitoring and Testing, Escalation Procedures, and Review Cycle.

Priority: 1

Regulation: BCBS 239; Basel Committee on Banking Supervision Principles for Effective Risk Data Aggregation and Reporting

Deadline: Within 30 days

Owner: Head of Regulatory Compliance

Action 2: Insert formal document governance elements including effective date, version number, approval date, next review date, and named document owner to address validity and timeliness deficiencies.

Priority: 2

Regulation: SR 11-7; BCBS 239 Principle 1 (Governance)

Deadline: Within 14 days

Owner: Policy Governance Office

Action 3: Define and document a clear scope statement covering all regulatory and compliance filings, subsidiaries, business units, and data systems to ensure comprehensive Regulatory Change Coverage (RCC).

Priority: 3

Regulation: Basel III; Applicable National Regulatory Reporting Rules

Deadline: Within 21 days

Owner: Regulatory Reporting Lead

Action 4: Develop and embed a control mapping matrix linking each policy requirement to applicable regulations and internal controls to improve Control Mapping Coverage (CMC) and Disclosure Completeness Score (DCS).

Priority: 4

Regulation: COSO Internal Control Framework; BCBS 239 Principle 6 (Adaptability)

Deadline: Within 45 days

Owner: Enterprise Risk Management (ERM) Team

Action 5: Implement documented data lineage standards for regulatory filing data, including source-to-report traceability, metadata documentation, and reconciliation checkpoints to enhance Data Lineage Integrity (DLI).

Priority: 5

Regulation: BCBS 239 Principles 3 and 4 (Accuracy and Completeness)

Deadline: Within 60 days

Owner: Chief Data Officer

Action 6: Establish a regulatory change management process requiring periodic reviews, documented updates, impact assessments, and version control logs to ensure ongoing completeness, validity, and timeliness.

Priority: 6

Regulation: BCBS 239 Principle 6; Local Regulatory Change Management Requirements

Deadline: Within 60 days and ongoing quarterly reviews

Owner: Regulatory Change Management Team

4.2 Recommendations

- Add missing required fields and ensure key identifiers/dates are captured.
- Standardize formats for dates, amounts, and IDs.
- Update expired/outdated dates.
- Populate the missing required field: Document Structure.
- Populate the missing required field: Document Scope.
- Correct the metadata parsing inconsistency where document_date_parsed (2025-03-10) does not align with the stated Creation Date (2024-03-01).
- Ensure automated validation rules correctly detect explicit dates, ownership, and structured sections to avoid false compliance flags.
- Consider adding a formal document control table at the beginning summarizing key metadata fields for enhanced audit readiness.
