Executive Summary

This document is an internal working draft extract of XYZ Bank plc’s Pillar 3 disclosures. It contains partial sections on scope of application, own funds, counterparty credit risk, remuneration, and risk management objectives. The document is incomplete, contains broken references, redactions, unreconciled capital figures, and inconsistencies in governance descriptions. It is explicitly marked as not for external publication.

Risk Assessment

High document integrity risk. As a draft regulatory disclosure, it lacks completeness, reconciliation to financial statements, confirmed regulatory references, accessible supporting documents, and consistent cross-referencing. If published in its current form, it would present significant regulatory, audit, and reputational risk, particularly given Pillar 3 transparency requirements under CRR.

2. Quality Dimensions

Core metrics are evaluated for every document. Domain-specific metrics are included only for domain-classified documents.

2.1 Core Quality Metrics

Metric	Description	Score	Weight	Status	Reasoning
Completeness	Measures presence of required fields	3	0.25	Critical	Although the document is highly fragmented (missing appendices, redacted tables, broken cross-references, and partial disclosures), it does contain multiple structured sections and quantitative data. Therefore, completeness is very low but not absolute zero.
Validity	Ensures format compliance	65	0.20	Critical	The document references relevant regulatory articles (CRR Articles 26, 51, 62) and standard metrics (LCR, NSFR). However, it is labeled as a draft, contains illustrative and unreconciled figures, and references non-existent sections, slightly reducing validity.
Consistency	Checks logical field relationships	96	0.20	Good	There are explicit inconsistencies: broken section references (7.1.2), conflicting governance statements (second line both oversight and trade execution), and unreconciled capital figures. Therefore, consistency cannot be considered perfect.
Accuracy	Validates extracted data correctness	35	0.20	Critical	Capital figures are marked as approximate, unaudited, and not reconciled. Regulatory references are partially confirmed ('to be confirmed'), and consolidation differences are under review. This supports a low but non-zero accuracy assessment.
Timeliness	Assesses data recency	4	0.10	Critical	The document includes a clear date reference (31 December 2025), indicating some temporal context. However, it lacks a formal publication date, review schedule, and is marked as an internal draft, limiting timeliness reliability.
Uniqueness	Identifies duplicate entries	100	0.05	Good	No duplication within the provided extract is evident. Content appears original to this draft, despite internal contradictions.

2.2 Banking Domain Metrics

No domain-specific evaluation was applicable for this document.

3. Issues & Observations

This section captures all flagged issues (as shown in the application).

Field	Issue Type	Description	Regulation	Severity
Document Body	Insufficient Content	Document is too short.	—	Critical
Document Structure	Missing Headings	Lacks clear section structure.	—	Moderate
Document Metadata	No Date Found	No recognizable date found.	—	Moderate
Document Ownership	No Author	No author/owner identified.	—	Moderate
Document Scope	Missing Scope	No scope statement found.	—	Moderate
Numeric Values	Invalid Percentage	Found percentage > 100%.	—	Moderate
Framework References	No Recognized Frameworks	No compliance frameworks referenced.	—	Moderate
Document Currency	No Year	No year references found.	—	Moderate
Review Schedule	No Review Date	No review date found.	—	Moderate
general	observation	Document explicitly marked as internal draft and not for external publication.	—	Moderate
general	observation	Appendices and methodology notes referenced but missing.	—	Moderate
general	observation	Capital amounts are unaudited, illustrative, and not reconciled.	—	Moderate
general	observation	Broken cross-reference to non-existent Section 7.1.2.	—	Moderate
general	observation	Remuneration disclosures do not follow EBA templates and contain redactions.	—	Moderate
general	observation	Contradiction in second line of defence responsibilities.	—	Moderate
general	observation	Risk appetite statement maintained externally and not accessible to auditors.	—	Moderate

4. Action Plan

4.1 Remediation Steps

Action 1: Perform a comprehensive gap analysis of the current Pillar 3 draft against CRR Part Eight and EBA ITS on supervisory reporting and disclosure requirements to identify all missing quantitative and qualitative disclosure elements.

Priority: 1

Regulation: CRR Part Eight (Articles 431–455) and EBA Implementing Technical Standards (ITS) on Pillar 3 disclosures

Deadline: Within 2 weeks

Owner: Regulatory Reporting Team in coordination with Regulatory Policy

Action 2: Redraft the document with a clearly defined structure aligned to regulatory disclosure templates, including mandatory sections such as scope of application, risk management objectives and policies, own funds, capital requirements, leverage, liquidity, and remuneration disclosures.

Priority: 2

Regulation: CRR Article 431 and EBA Pillar 3 disclosure framework (EU 2021/637)

Deadline: Within 4 weeks

Owner: Head of Prudential Reporting

Action 3: Insert a formal scope statement specifying the consolidation basis (prudential scope vs. accounting scope), entities included, reporting reference date, and applicability of waivers or exemptions.

Priority: 3

Regulation: CRR Articles 436 and 437

Deadline: Within 3 weeks

Owner: Regulatory Policy Team

Action 4: Ensure the document includes a clear reporting reference date, publication date, version control, and review cycle to address timeliness and traceability requirements.

Priority: 4

Regulation: CRR Article 433 and internal disclosure governance policy

Deadline: Within 2 weeks

Owner: Regulatory Reporting Governance Function

Action 5: Assign a formally documented document owner and accountable executive (e.g., CRO or CFO), including evidence of senior management approval prior to publication.

Priority: 5

Regulation: CRR Article 431(3) and EBA Guidelines on disclosure governance

Deadline: Within 2 weeks

Owner: Chief Risk Officer with Company Secretariat

Action 6: Implement a quality assurance and validation process including reconciliation of Pillar 3 figures to COREP/FINREP submissions and audited financial statements to improve completeness, validity, and accuracy.

Priority: 6

Regulation: CRR Article 434 and EBA Guidelines on harmonised definitions and templates

Deadline: Within 6 weeks

Owner: Regulatory Reporting Control and Finance Control Functions

4.2 Recommendations

- Add missing required fields and ensure key identifiers/dates are captured.
- Standardize formats for dates, amounts, and IDs.
- Verify extracted values against the document text.
- Update expired/outdated dates.
- Populate the missing required field: Document Structure.
- Populate the missing required field: Document Scope.
- Correct the format of Numeric Values.
- Provide a complete scope of consolidation with attached mapping between IFRS and CRR scopes.
- Reconcile all capital figures to audited financial statements and remove approximate markers (~, ?, illustrative).
- Correct broken cross-references and ensure all referenced sections and appendices exist.
- Replace redacted remuneration tables with full EBA-compliant templates.
- Clarify governance roles to resolve contradictions in the three-lines-of-defence model.
- Include formal document metadata: publication date, version control, owner, approval status, and review cycle.
- Ensure alignment with CRR Pillar 3 disclosure requirements and EBA implementing technical standards.
